Work Experience

Quality Assistant   Aug 2020 – Currently
Alobasani
Istanbul, Turkey

• Monitor and maintain the global client assessment system.
• Assisted with implementing and maintaining all compliance planning related to quality assurance.
• Assisted with documenting and communicating internal audit conclusions.

Front-End Developer   Feb 2017 – July 2017
Malath Tech
Damascus, Syria

• Collaborate with designers and back-end developers to implement and improve features.
• Writing unit tests for developed tasks.
• Ensuring high performance.
• Proven track record of being part of the successful delivery of projects across the entire app life cycle: concept, design, build, deploy, test, release to app stores and support.
• Good knowledge of development patterns.

Technical Support Department   Nov 2015 – Jan 2017
Syriatel Mobile Telecom
Damascus, Syria

• Communicate with the employees to analyze their problem and translating it into a technical issue that should be solved either by our team or by help of other departments.
• Writing and optimizing complex queries for special and recursive requests to manipulate and extract data from SQL Server.
• Communicating with customers and being able the absorb their dissatisfaction and aid them to maintain the belief in Syriatel as the leading GSM provider in Syria.

Oracle PL/SQL Developer (Part Time)   Jun 2013 – Oct 2015
IT Way Co.
Damascus, Syria

• Wrote SQL, PL/SQL, programs required to retrieve data using cursors and exception handling.
• Creating indexes on tables to improve the performance and hiding the actual tables and to eliminate the complexity of the large queries.
•Coordinating with the design team to provide them with the necessary stored procedures and packages and the necessary insight into the data.
•Built useful reporting deliverable to properly document analysis results and provide performance improvement feedback.

- Object-Oriented Programming (OOP)
- Clips and maxing it with another environment
- Designing the UML documentation
- Analytics on Structured and Unstructured Data
- Decision-making and strategic planning
- Wordpress development
- Dashboarding and Reporting

Why Me?

As having great interest in both technical and business aspects of every project, and the flexibility to try new stuff. I tend to keep the project on track to provide much needed better user experience and keeps me motivated to learn about new technologies and new ways to improve our development results…

Always on the lookout for new challenges.
